Introduction to Earth

FLIGHT PREPARATION TRAINING SERIES

Produced under the Supervision of the Training Division, Bureau of Aeronautics, U.S. Navy

79 pages, 11 × 8½, illustrated, 6/-

THIS book gives an over-all view of the earth as a sphere, place relationships, war zones, general climatic considerations underlying strategy, and something of the strategic significance of military objectives.

There are chapters on introduction to earth, geography of axis strategy, United Nations supply lines, strategy of the Arctic, key objectives of economic importance, key objectives of locational significance, climates of the oceans, and climate and weather in selected war zones. The many excellent maps are a feature of the book.

Announcing VOLUME XIV

ANNUAL REVIEW OF BIOCHEMISTRY

Published by
ANNUAL REVIEWS, INC.

July 15, 1945

Editor: **J Murray Luck**
Associate Editor: **James H. C. Smith**
Editorial Committee:
H. J. Almquist **J. M. Luck**
D. R. Hoagland **H. A. Spoehr**
C. L. A. Schmidt

"Every person interested in the nutrition of plants and animals and in the chemistry of the compounds they contain will need this volume for ready reference." (**Soil Science**, 1944).
"This series of volumes has been growing in importance and value with the years until now it constitutes the best source of information for biochemists aside from original papers on which the reviews are based." (**Canadian Chemistry and Process Industries**, Vol. 29, No. 9, 1941).

CONTENTS.—Biological Oxidations and Reductions, C. A. Elvehjem and H. Lardy; Enzymes that Hydrolyze the Carbon-Nitrogen Bond: Proteinases, Peptidases, and Amidases, D. M. Greenberg and T. Winnick; Nonproteolytic, Nonoxidative Enzymes, H. Lineweaver and E. F. Jansen; The Chemistry of the Carbohydrates, C. D. Hurd; Chemistry of the Lipids, H. E. Longenecker and B. F. Daubert; Chemistry of the Amino Acids and Proteins, J. Steinhardt; Chemistry of the Nucleic Acids and Nucleo-proteins, J. M. Gulland, G. R. Barker, and D. O. Jordan; X-Ray Studies on Compounds of Biochemical Interest, I. Fankuchen; Chemistry of the Steroids, W. L. Ruigh; Chemistry and Metabolism of the Compounds of Sulfur, J. H. W. Lugg; Chemistry and Metabolism of the Compounds of Phosphorus, H. M. Kalckar; Carbohydrate Metabolism, J. A. Russell; Fat Metabolism, E. F. Gildea and E. B. Man; Metabolism of Proteins and Amino Acids, P. P. Cohen; Chemistry of the Triterpenes, C. R. Noller; Mineral Metabolism, J. Sendroy, Jr.; Nutrition, F. J. Stare, D. M. Hegsted, and J. M. McKibben; Water-Soluble Vitamins, L. C. Norris and G. F. Heuser; Fat-Soluble Vitamins, J. C. Fritz; Chemistry of the Hormones, W. T. Salter; Animal Pigments, H. F. Holden; Detoxication Mechanisms, W. A. Perlzweig and P. Handler; Biochemistry of Malignant Tissue, J. P. Greenstein; Nitrogenous Constituents of Plants, J. G. Wood; Biological Nitrogen Fixation, R. H. Burris and P. W. Wilson; Mineral Nutrition of Plants, H. D. Chapman; Chemistry and Metabolism of Bacteria, J. H. Mueller; Chemistry of Antibiotic Substances other than Penicillin, A. E. Oxford.

Approximately 835 pages
Author and Subject Indexes

$5.00 per copy (American funds)
Postpaid in U.S.A.

Frequency Modulation

by AUGUST HUND

Technical Consultant U.S. Navy Radio and Sound Laboratory

375 pages, 9×6, 113 illustrations, 24/-

Here is an engineering treatment of frequency modulation, covering both basic principles and the design of commercial apparatus. The phenomena and features of frequency and phase modulation are described in a thorough approach that includes comparison with customary amplitude modulation, following which applications in FM transmitters, receivers, auxiliary apparatus, and antennas are fully discussed. The use of tables and curves to simplify design is emphasized.

Fundamentals are plainly and thoroughly covered in an extensive chapter, while the rest of the book covers applications in auxiliary apparatus of FM networks, transmitters, receivers and aerials, exemplifying the use of numerical calculations and design formulas in types of apparatus now in use.

DICTIONARY of SCIENCE and TECHNOLOGY

in ENGLISH · FRENCH · GERMAN · SPANISH

By MAXIM NEWMARK

THREE BILINGUAL DICTIONARIES IN ONE

Separate indexes in French, German, and Spanish, permit two-way reference of any of these languages with the English.

Intended for engineering, scientific and technical libraries, for English-speaking industrial and technical personnel in South America and Europe, for radio monitors and short-wave broadcasters to foreign countries, for modern language teachers, professional translators, importers, exporters, and others.

Complete with Indexes, Conversion Tables and Technical Abbreviations . . $6.00

A symposium of utmost importance to everyone concerned with Architectural, Engineering or Social Planning Activity.

New Architecture and City Planning

(Illustrated)

Edited by PAUL ZUCKER

A brilliantly executed Symposium covering the problems of our future development in the fields of Architecture, City and Regional Planning.

Over fifty leading experts of the United States—architects, engineers, city planners, administrators, sociologists and scientists—have contributed their views . . . on the basis of their practical, professional experience. **$10.00**

THE SPEKKER ABSORPTIOMETER

A PHOTOELECTRIC INSTRUMENT FOR COLORIMETRIC METHODS OF CHEMICAL AND BIOCHEMICAL ANALYSIS

FOR ESTIMATION of metals, sugar solutions, phosphates, hæmoglobin, blood sugar, carotene, pH values, bacteriological solutions, etc.

Used by Szigeti for oxy- and methæmoglobin (*Biochemical Journal*, 34, 1460, 1940).

OPTICAL AIDS TO CHEMICAL ANALYSES

Instruments which substitute definite scale readings for visual comparisons of colour or intensity

ADVANTAGES:

- Readings obtained in a few seconds.
- Independent of personal errors.
- Compact and portable.
- Few optical parts to keep clean.
- Independent of fluctuations of mains voltage.
- No batteries or amplifiers to maintain.

THE SPEKKER FLUORIMETER

Measures photoelectrically the fluorescence produced in solutions.

Renders fluorimetry quantitative.

Suitable for the thiochrome test for Vitamin B_1 (Jansen, *Rec. Trav. Chim.*, 55, 1046, 1936) and Weisberg and Levin's method for Vitamin B_2 (*Ind. Eng. Chem.*, 9, 523, 1937).

GENERAL ZOOLOGY

By TRACY I. STORER

Professor of Zoology, University of California

798 pages, 9 × 6, 551 figures, 5 coloured plates, 22/6

THIS important new book is designed to serve as an introductory text for college students with no previous knowledge of zoology. Part one comprises general animal biology, including structure, physiology, reproduction, genetics, ecology, distribution, evolution, history, and classification. Part two covers the animal kingdom from protozoa to man, describing the structure, functions, natural history and economic relations of common representatives, and a classification of each group.

The illustrations constitute one of the most outstanding and distinctive features of this text in that they are completely new. Most of the anatomical figures have been drawn directly from dissections made under the author's immediate direction, and are shown from the left side in each case to facilitate comparisons. In each series showing embryological or larval development the individual figures have been brought into comparable positions so that changes during growth or metamorphosis can be traced readily and direct comparisons made with the figures of adult animals.

ARNOLD BOOKS

New (Second) Edition, Revised and Enlarged

Geology for Engineers

By **F. G. H. BLYTH, M.Sc., F.G.S.,** Lecturer in Engineering Geology, Imperial College of Science and Technology, London. **Second edition ready Oct. 18**; enlarged to viii + 330 pages, with 141 illustrations and 16 plates. Price as before, 21s. net.

"No book, of like size, could be expected to provide for engineers a better or more comprehensive exposition of geology and its application to engineering."

—*The Surveyor* (of 1st edn.).

Tinplate

By **W. E. HOARE, B.Sc., A.I.P.E.,** Technical Development Officer, and **E. S. HEDGES, Ph.D., D.Sc., A.R.I.C.,** Director of Research, Tin Research Institute. Crown quarto (10 in. × 7½ in.), viii + 292 pages, 151 diagrams and photographs, 6 folding plates. 40s. net.

The first modern book devoted to this great industry; it comprehends all aspects of the subject, including manufacture, uses, properties, structure, testing and corrosion resistance. The book is handsomely illustrated and the bibliography includes 400 references.

Metallic Corrosion

Passivity and Protection

By **U. R. EVANS, M.A., Sc.D.,** has been almost completely rewritten and will now make a book of some 900 pages; the author index alone has grown by over 1,200 names. Publication is expected early in 1946.

Handbook of Industrial Radiology

By Members of the Industrial Radiology Group of the Institute of Physics. Edited by **J. A. CROWTHER, M.A., Sc.D., F.Inst.P.** viii + 204 pages, 105 illustrations. 21s. net.

Deals with the application of X-rays to Heavy Metals, Light Metals and various other materials, the design of X-ray equipment, X-ray protection, gamma radiography, and the response of photographic materials to X-rays.

A LABORATORY HANDBOOK OF

Pulp & Paper Manufacture

Incorporating the Fourth Edition of Stevens's "Paper Mill Chemist"

By **JULIUS GRANT, M.Sc., Ph.D., F.R.I.C.,** Chief Chemist, Messrs. John Dickinson & Co., Ltd., Croxley Mills. viii + 320 pages, 70 illustrations, 8 plates. 28s. net.

This valuable handbook combines the best features of Dr. Stevens's well-tried manual with a presentation of the most up-to-date knowledge on control and testing.

Bacteria in Relation to the Milk Supply

By **C. H. CHALMERS, B.Sc. (Edin.), N.D.A. New (Third) Edition,** extensively revised. viii + 260 pages, 55 illustrations in the text. 8s. 6d.

"The book can once more be recommended as an up-to-date and reliable guide to those concerned with the control of milk. At the same time it is clearly and attractively written."—*Bulletin of Hygiene.*

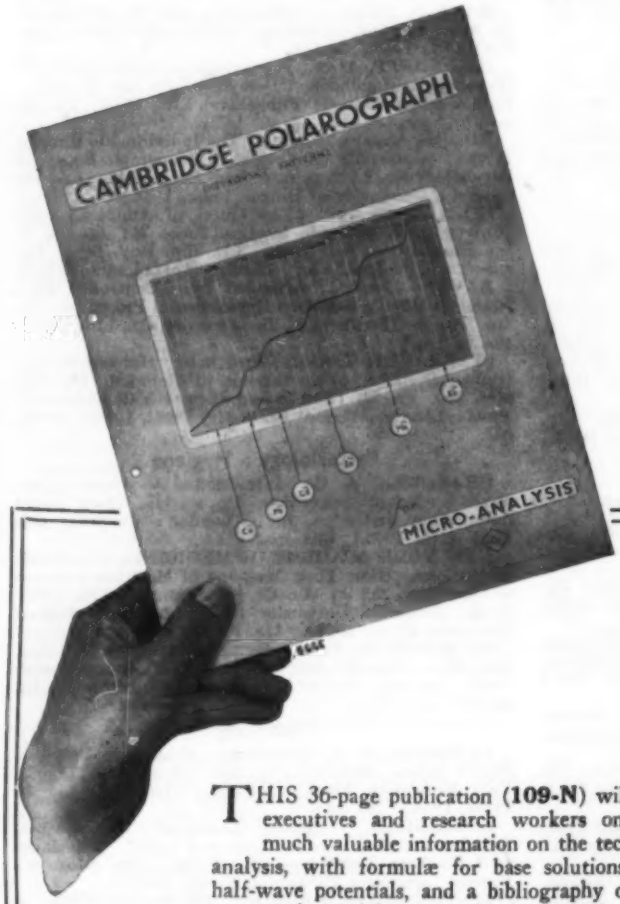
CAMBRIDGE POLAROGRAPH

(HEYROVSKY DROPPING MERCURY ELECTRODE METHOD)



Some Fields of Application :

PHYSICAL CHEMISTRY
METALLURGY
MINERALOGY
SUGAR
EXPLOSIVES
GASES
AGRICULTURE
MEDICINE
OIL DISTILLING
DYEING & BLEACHING
CERAMICS
WATER PURIFICATION

THIS 36-page publication (**109-N**) will be sent to responsible executives and research workers on request. It contains much valuable information on the technique of polarographic analysis, with formulæ for base solutions, tables and charts of half-wave potentials, and a bibliography of 168 important references. A special feature is the reproduction of actual records obtained in original experiments in our own laboratory. A supplement describes the new Cambridge Voltamoscope, for routine determinations, which performs the same functions, but is non-recording.

PRINTED IN GREAT BRITAIN BY FISHER, KNIGHT AND CO., LTD., ST. ALBANS

CHURCHILL'S SCIENCE BOOKS

Two New Editions

PRINCIPLES OF HUMAN PHYSIOLOGY (STARLING)
By C. LOVATT EVANS, D.Sc., F.R.C.P., F.R.S. *Ninth Edition.* 668 Illustrations, 7 in colour. 36s.

PREGL'S QUANTITATIVE ORGANIC MICRO-ANALYSIS
Fourth English Edition. Revised by JULIUS GRANT, M.Sc., Ph.D., F.R.I.C. 94 Illustrations. 21s.

ELEMENTARY PHYSICS
For Medical, First Year University Science Students and General Use in Schools
By G. STEAD, M.A., D.Sc., F.Inst.P. *Sixth Edition.* 430 Illustrations. 14s.

RECENT ADVANCES IN CYTOLOGY
By C. D. DARLINGTON, D.Sc., Ph.D., F.R.S. *Second Edition.* 16 Plates, 160 Text-figures and 81 Tables. 24s.

THE EXAMINATION OF WATERS AND WATER SUPPLIES (Thresh, Beale and Suckling)
By E. V. SUCKLING, M.B., B.S., D.P.H. *Fifth Edition.* 63 Illustrations. 60s.

AN INTRODUCTION TO COMPARATIVE ZOOLOGY
By F. G. SAREL WHITFIELD, F.R.E.S., F.R.M.S., and A. H. WOOD, M.A. 141 Illustrations. 15s.

PHYSICAL TREATMENT by Movement, Manipulation and Massage
By J. MENNELL, M.A., M.D., B.C. *Fifth Edition.* 288 Illustrations. 30s.

THE EARLY TREATMENT OF NERVOUS AND MENTAL DISORDERS
By W. LINDESAY NEUSTATTER, M.D., B.Sc., M.R.C.P. 15s.

CLOWES' AND COLEMAN'S QUANTITATIVE CHEMICAL ANALYSIS
Fifteenth Edition. Revised by JULIUS GRANT, M.Sc., Ph.D., F.R.I.C. 143 Illustrations. 21s.

RECENT ADVANCES IN PHYSICAL CHEMISTRY
By S. GLASSTONE, D.Sc., Ph.D., F.R.I.C. *Third Edition.* 31 Illustrations. 18s.

OUT OF WORKING HOURS: Medical Psychology on Special Occasions
By H. YELLOWLEES, M.D., F.R.C.P., D.P.M. 8s. 6d.

RECENT ADVANCES IN PHYSIOLOGY (Lovatt Evans)
By W. H. NEWTON, M.D., M.Sc. *Sixth Edition.* 109 Illustrations. 16s.

MEDICAL ELECTRICITY FOR MASSAGE STUDENTS
By HUGH MORRIS, M.D., D.M.R.E. *Second Edition.* 114 Illustrations. 18s.

A TEXTBOOK OF BIOCHEMISTRY
For Students of Medicine and Science
By A. T. CAMERON, D.Sc., F.R.I.C., F.R.S.C. *Sixth Edition.* 3 Plates and 25 Text-figures. 18s.

A LABORATORY MANUAL OF EXPERIMENTS IN PHYSICS

By L. R. INGERSOLL
and M. J. MARTIN
Professors of Physics, University of Wisconsin

342 pages, 8 × 5½, illustrated, 15/-

THE revision of this manual includes the latest developments in apparatus and methods. Important additions have been made to some of the older experiments: several experiments have been revised; two completely new experiments have been added: Aerodynamic Forces and The Law of Light Transmission; the use of Polaroid in polarized light experiments, and the use of the photocell in photometer experiments.

Contents

Mechanics.	Wave Motion and Sound.
Heat.	Light.
Electricity and Magnetism.	Appendix.

APPARATUS FOR CHEMICAL ANALYSIS

MODERN OUTFITS of special interest to the industrial chemist, both for research work and for routine analyses. They are described in the publications mentioned below, which contain much valuable information.

POLAROGRAPH

For the rapid electro-chemical analysis of solutions, enabling traces of metals and other substances to be determined by the Heyrovsky dropping mercury electrode method. Full notes on technique, with an extensive bibliography, in

LIST 109-N

An indicating polarograph (the "Voltamoscope") is also available.

TITRATION APPARATUS

(*Illustrated*)

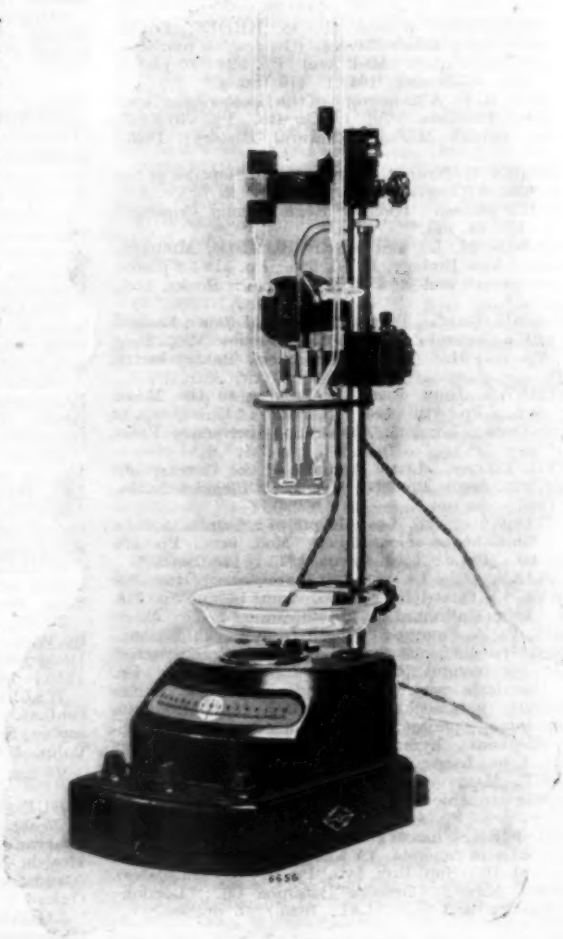
For applications where a titration method is desirable. Especially useful for determining end-points in coloured solutions. Described in

SHEET 247-N

pH METERS

The full range of instruments for measuring, recording and controlling pH in all branches of research and industry is described in

LIST 108-N



Any or all of these useful publications gladly sent on request

Mathematics for Electricians and Radiomen

By NELSON M. COOKE
Chief Radio Electrician, U.S. Navy

604 pages, 9 × 6, 24s. net

THE dominant aim of this book is to furnish the electrical and radio student with a sound mathematical foundation and to show him how to apply this knowledge to the solution of practical problems most frequently encountered in actual practice.

The mathematical scope of the book includes elementary algebra through quadratic equations, logarithms, trigonometry, plane vector and elementary vector algebra as applied to alternating current circuits. Throughout the book, chapters are included which deal entirely with the application of preceding mathematical principles to electrical circuits.

ARNOLD BOOKS

NOW IN STOCK*

The Pasteurization of Milk

By **G. S. WILSON, M.D., F.R.C.P., D.P.H.,** Professor of Bacteriology as applied to Hygiene, London School of Hygiene & Tropical Medicine. Dy. 8vo. xii + 212 pp. 18s. net.

"A well-planned, well-written and well-documented book . . . a reasoned statement of the medical evidence in favour of the pasteurization, or effective heat-treatment, of all milk."—*Nature.*

The Economics of Poor Land Arable Farming

By **S. M. MAKINGS, Ph.D., B.Sc. (Econ.), N.D.A.,** Economics Dept., Midland Agricultural College, Loughborough. Demy 8vo. With four maps. 18s. net.

An examination of a problem of national importance, as exemplified by three typical areas in the Midlands, with valuable conclusions. "One of the most useful books on agricultural economics which has appeared for some time."—*Agriculture.*

Plant Ecology

By **HILDA DRABBLE.** With 24 photographs, mainly from Professor E. J. Salisbury's collection. 7s. 6d. net.

"We have not met a better introduction to the study of ecology than this. It is admirably done and most readable."—*Jnl. of Education.*

Founders of Oceanography and their Work

By the late **Sir WILLIAM HERDMAN, C.B.E., D.Sc., F.R.S.** xii + 340 pages, with 29 plates. 21s. net.

A few copies remain of this handsome and delightful work, on pre-war paper and at its pre-war price. "The book is one of great freshness and charm," said the *Nature* reviewer, "much of which is due to the impress of the author's personality."

LAKE & RASTALL'S Text-Book of Geology

Fifth Edition, revised by **R. H. RASTALL, Sc.D., F.G.S.,** Fellow of Christ's College and formerly Lecturer in Economic Geology in the University of Cambridge. viii + 492 pages, 129 text illustrations and 56 photographs. *New printing expected immediately.* 25s. net.

"A clearly written and well-balanced introduction to geology . . . the variety of topics dealt with is very striking: there are few general problems in geology which are not touched upon."—*Geological Magazine.*

A New Geological Map of Australia

With a 177 p. Volume of Explanatory Notes. By the late **Sir T. W. EDGEWORTH DAVID, K.B.E., C.M.G., F.R.S.** Scale 1 in. = 47.2 m. approx.; in four sheets, 42 in. × 34 in. with 11 coloured sections round margins. Paper flat, with Notes, 20s. net. (Inland postage map, in tube, 1s. 3d.) Dissected, mounted on linen, in case, with Notes, 42s. net.

* *Supplies cannot always be guaranteed in present conditions, but we shall be glad to send details and report on the supply position regarding any particular titles.*

CAMBRIDGE VERSATILE GALVANOMETER

D.C.

MEASUREMENTS

Currents: 0.000002 to 24 amperes
Pressures: 0.00002 to 1200 volts
Resistances: 0.001 to 1000 ohms
As Resistance Meter (Scroggie patent)

A.C.

MEASUREMENTS

Currents: 0.00001 to 24 amperes
Pressures: 0.01 to 1200 volts

THIS Unipivot Galvanometer can be applied to a large variety of measurements. By the use of easily attached interchangeable accessories, or by the addition of A.C. and D.C. range boxes, the range of measurements can be varied within the wide limits stated.

Full details are given in ***LIST No. 909-N.*** *May we send you a copy ?*

VIBRATION ANALYSIS

By N. O. MYKLESTAD
Research Associate in Aeronautics,
Daniel Guggenheim Aeronautical Laboratory,
California Institute of Technology

303 pages 8¼ × 5¼ 190 Illustrations 21s.

A THOROUGH discussion of the fundamentals of vibration and a clear detailed explanation of vibration analysis. Such topics as amplitude, balancing, damping, flutter, dissipation of energy, harmonic motion, and modes of vibration are thoroughly described and the calculations involved are illustrated by worked-out examples. The second part of the book shows the applications of vibration analysis to important practical problems.

Contents

Introduction
Fundamentals
Undamped Vibrations of Systems of One Degree of Freedom
Damped Vibrations of Systems of One Degree of Freedom
Vibrations of Systems with More Than One Degree of Freedom
Applications to Important Practical Problems

HILGER POLARIMETERS

Production of these
robust accurate instruments
has been resumed

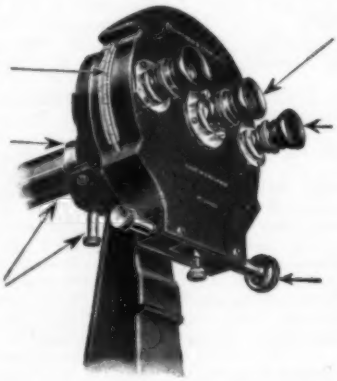
Fully enclosed electrically illuminated circle ; Degree scale reading to 0·01°; Sugar scale ; Variable half-shadow angle ; Tripartite field ; Lippich polariser specially cut to prevent fracture of edges ; Exceptionally robust easily cleaned stand ; Ultra-violet polarising systems available.

ADAM HILGER LTD.
98 St. Pancras Way
Camden Road
LONDON N.W.1

'Phone : GULliver 5571

B-S POLARIMETERS

for Research purposes where the highest degree of accuracy required is



Glass circle with dividing reading to 0·01 degree by double vernier.

Circle centre on ball bearings.

Easily removable tube trough.

Stationary observation telescope arranged to take filter or spectroscopic eyepiece.

Circle reader giving enlarged image of scale and vernier by transmitted light through the circle.

Slow motion adjustment always in action without clamping circle

All instruments are suitable for the measurement of rotatory dispersion by the addition of either a spectroscopic eyepiece or monochromatic illuminator, or in the ultra-violet by a quartz spectrograph.

NEW OSCILLOGRAPH

Usable up to 5 Mc/s

PRICE £75

The Mullard High Frequency Cathode Ray Oscillograph type E.805 sets a new standard for portable instruments and embodies many features previously found only in instruments twice its size and price. Special features include: High impedance Input Circuit. High gain, wide band Vertical Amplifier (Sensitivity 5 mV/cm, frequency range 2 c/s - 5 Mc/s). Electronically stabilised power supply. This instrument is now available in limited quantities. Write for leaflet M.503 to:— THE MULLARD WIRELESS SERVICE CO. LTD., Measuring Apparatus Section, Century House, Shaftesbury Avenue, W.C.2.

STEREOGRAPHIC SCALE

With the aid of this inexpensive device many problems usually left to the expert—such as correct orientation, duration of sunlight, determination of time, distance and true bearing between one point and another on the earth's surface, identification of stars—can be solved by plane geometry in simple constructions on ordinary paper, the method having the special advantage of presenting to the eye a natural diagram of what is given or to be found.

A descriptive pamphlet arranged and illustrated in such a way as to bring the constructions under a few rules for easy reference will be supplied on application.

COMMONWEALTH OF AUSTRALIA

COUNCIL FOR SCIENTIFIC AND INDUSTRIAL RESEARCH

DIVISION OF INDUSTRIAL CHEMISTRY

APPOINTMENT OF SENIOR RESEARCH OFFICER FOR X-RAY CRYSTALLOGRAPHY

Applications are invited for one position of Senior Research Officer, Division of Industrial Chemistry, Melbourne. *Duties:* To undertake X-ray crystallographic investigations of a fundamental nature within the Division's Chemical Physics Section. *Qualifications:* University degree in science or equivalent qualifications together with several years experience in X-ray crystallography. *Salary:* Dependent on qualifications and experience, commencing salary will be within the range of Senior Research Officer (Male, £A625 to £A750 p.a. nominal; Female, £A563 to £A688 p.a. nominal; five equal increments, first automatic, remainder discretionary). *Note.*—The present cost-of-living adjustment to the above nominal salaries is an additional £40 p.a. in the case of a male appointee and £27 p.a. in respect of a female.

Subject to a satisfactory medical examination, the successful applicant will be appointed initially on probation; after the expiry of a period of twelve months, if confirmed in his or her appointment as an officer of the Council, will be eligible to contribute to, and receive benefits from, either the Commonwealth Superannuation Fund or the Commonwealth Provident Fund.

Applications stating date of birth, nationality, present employment, particulars of qualifications and experience, and accompanied by copies of not more than four testimonials, should reach the Secretary, Australian Scientific Research Liaison Office, Australia House, Strand, London, W.C.2, not later than February 8.

G. A. COOK,
Secretary.

Council for Scientific and Industrial Research,
314 Albert Street,
East Melbourne, C.2, Victoria.

HOME OFFICE FORENSIC SCIENCE LABORATORIES

Applications are invited for men and women for the following posts at the Home Office Forensic Science Laboratories:

(*a*) BIOLOGISTS at (i) the North Eastern Laboratory at Wakefield; (ii) the West Midland Laboratory at Birmingham; (iii) the South Western Laboratory at Bristol; (iv) the North Western Laboratory at Preston. (Ref. No. F.5063A).

(*b*) CHEMISTS at (i) the North Eastern Laboratory at Wakefield (Ref. No. F.5387A); and (ii) the South Western Laboratory at Bristol (Ref. No. 5388A).

Only well qualified candidates of British birth and parentage should apply. The Biologist should be an Honours Graduate in Botany, with subsidiary qualifications in Zoology and/or Bacteriology. The Chemist should have an Honours degree in Chemistry; experience of micro-analysis and the use of physico-analytical instruments is also required.

Commencing salary for men would be on the range of £275 to £650 per annum plus Civil Service War Bonus (at present £60 per annum), and for women £275 to £520 plus War Bonus (at present £48 per annum), both according to age and qualifications. The ranges of salary are subject to review in the light of the White Paper on the Scientific Civil Service. The scales of salary recommended in the White Paper are: Scientific Officers £255 to £470 per annum, Senior Scientific Officer £520 to £710 per annum, plus bonus, with slightly lower scales for women. There are opportunities for promotion to ranks carrying salaries at present up to £1,250 per annum.

A temporary appointment only can be offered at the present time, but candidates born on or after August 2, 1915, will be eligible to compete in the post-war reconstruction competitions with a view to being established. It is not possible to offer prospects of establishment to candidates born before that date unless the circumstances are very exceptional.

Applications received by the Home Office in reply to earlier advertisement for similar posts will be considered and applicants need not apply again.

Write quoting appropriate reference numbers to Ministry of Labour and National Service, Appointments Department, Technical and Scientific Register, Room 572, York House, Kingsway, London, W.C.2, for application form which must be returned completed, with three copies of recent testimonials, by January 19, 1946.

Physicist required on Research Staff of glass manufacturers in North East. Honours degree and about five years industrial or research experience (not necessarily in glass) preferred. Salary according to qualifications. Box 488, T. G. Scott & Son, Ltd., 9 Arundel Street, London, W.C.2.

DEPARTMENT OF SCIENTIFIC AND INDUSTRIAL RESEARCH

Applications are invited for (a) two vacancies on the staff of the Water Pollution Research Laboratory, Watford, mainly for research on methods of treatment of water, sewage and trade waste waters (Ref. F.5087.A) and (b) one vacancy on the staff of the Chemical Research Laboratory, Teddington, for research on the methods of separation of tar components, including distillation (Ref. F. 5216.A). Candidates should have a 1st or 2nd Class Honours Degree in Chemistry, or equivalent qualifications, with postgraduate experience, preferably in research. One of the posts at the Water Pollution Research Laboratory calls for training or experience in biochemistry or bacteriology; at the Chemical Research Laboratory a Physical Chemist with good knowledge of thermodynamics is required. In the first instance, pending the application of the new scheme for Scientific Staff in the Government Service recently published, (Cmd. 6679), the appointments will be in the grade of either Temporary Junior Scientific Officer or Temporary Scientific Officer. The initial salary will be between £300 and £500 plus Civil Service war bonus.

Write, quoting appropriate reference number, to the Ministry of Labour and National Service, Appointments Department, Technical and Scientific Register, Room 572, York House, Kingsway, London, W.C.2, for application form which must be returned completed by January 18.

Manchester Municipal COLLEGE OF TECHNOLOGY

(Faculty of Technology in the University of Manchester).

Appointment of
